### ABSTRACT

*The article deals with the problem of reading culture in the information society. Examples of solving this problem in different countries are given. Recommendations are given to improve the level of reading culture. The essence of the project is that the younger generation would have the opportunity to choose the desired works, then follow the questions on the Antolin system for a specific work. A student who reads additional literature has a culture of reading, has analytical thinking, is able to find ways to solve various problems, develops harmoniously. Thus, we can conclude that the problem of reading culture occupies an important place not only in our country, but also in other, more developed and developing ones.*
