ABSTRACT

In this article, one of the auxiliary words of the Uzbek language - some of the issues that cause controversy around the assistants was expressed. In this place, we want to emphasize the same thing, they always remember the idea that "auxiliary words come from independent words", acting as a bridge between independent words and auxiliary words in a certain sense. In fact, in these interpretations, the so-called lexeme of the word, and the lexeme is considered a lexical figurative element are thought-provoking words to be called auxiliary words. Because the linguistic nature of auxiliary words does not allow them to be viewed in the way they are interpreted, that is, as a lexical unit. But a slightly different approach to the issue makes it clear. Hence, independent-auxiliary words occupy an intermediate position between pure auxiliary words and pure independent words (5, 48-49).
