ABSTRACT

The article describes the factors and tools that affect the mechanism of sustainable development of industrial enterprises. The industrial complex of Uzbekistan with a complex differentiated and diversified structure is the most important component of the entire national economy of the country. The changes taking place in the modern economy objectively contributed to the need of studying the issues of strategic management of industrial enterprises in the context of sustainable development. The article discusses theoretical approaches to this issue, different views on the definitions of the categories "sustainable development" and "economic stability". Conclusions and recommendations are given, factors and tools influencing the mechanism of sustainable development of industrial enterprises are analyzed.

KEYWORDS: *Industrial Enterprises, Sustainable Development, Economical Factors & Tools, Indicator System Of Sustainable Development, Economic Systems.*
