### ABSTRACT

*Working capital is the circulating money of any organisation like blood of human body. It is due to the deficiency of working capital most of the organisation in India moved for technical failure. It is beyond-doubt that the impact of working capital would be directly there on the profitability of any organisation. The present paper is a modest attempt to examine the nature and components of working capital, sources of working capital, net working capital trends, and the impact of working capital over the profitability of the organisation in an analytical way.*

**KEYWORDS:** *Components, Circulating, Profitability*
